

Publikationen 2009

Epishin, A.; Link, T.; Klingelhöffer, H.; Fedelich, B.; Bruckner, U.; Portella, P. D.:
New technique for characterization of microstructural degradation under creep: Application to the nickel-base superalloy CMSX-4
Materials Science and Engineering A 510-511, (2009), S. 262-265

Epishin, A.; Link, T.; Klingelhöffer, H.; Fedelich, B.; Portella, P. D.:
Creep damage mechanisms of single-crystal nickel base superalloys
Creep & Fracture in high temperature components: Design & Life Assessment issues, (2009), S. 692-701

Fedelich, B.; Kunecke, G.; Epishin, A.; Link, T.; Portella, P. D.:
Constitutive modelling of creep degradation due to rafting in single-crystalline Ni-base superalloys
Materials Science and Engineering A 510-511, (2009), S. 273-277

Gall, S.; Müller, S.; Reimers, W.:
Aluminium coating of magnesium hollow profiles by using the coextrusion process
International Aluminium Journal 85, (2009), S. 63-67

Gall, S.; Weber, C.; Müller, S.; Reimers, W.:
Extrusion of magnesium sheets
In: Magnesium, 8th International Conference on Magnesium Alloys and Applications, ed. by K.U. Kainer, (2009), S. 524-530

Gogova, D.; Thomas, L.-K.; Camin, B.:
Comparative study of gaschromic and electrochromic effect in thermally evaporated tungsten oxide thin films
Thin Solid Films 517, (2009), S. 3326-3331

Huppmann, M.; Brömmelhoff, K.; Reimers, W.:
Low cycle fatigue properties of extruded magnesium alloy AZ31 processed by different extrusion conditions
In: Magnesium, 8th International Conference on Magnesium Alloys and Applications, ed. by K.U. Kainer, (2009), S. 739-744

Karlson, M.; Röttger, A.; Silvia, P.-A.; Weber, S.; Pyzalla, A. R.; Reimers, W.; Theisen, W.:
Hot direct extrusion of abrasion resistant Fe-base metal matrix composites - microstructure and wear properties
International Symposium on Friction, Wear and Wear Protection, (2009), S. 152-158

Klaus, M.; Reimers, W.; Genzel, Ch.:
Application of energy-dispersive diffraction to the analysis of highly inhomogeneous residual stress field in thin film structures
Powder Diffraction Suppl. 24, (S1), (2009), S. S82 - S86

Klingelhöffer, H.; Epishin, A.; Link, T.:

Low cycle fatigue of the single-crystal nickel-base superalloy CMSX-4-anisotropy and effect of creep damage

Materials Testing-Materials and Components Technology and Application 51, (5), (2009), S. 291-294

Link, T.; Epishin, A.; Fedelich, B.:

Inhomogeneity of misfit stresses in nickel-base superalloys: effect on propagation of matrix dislocation loops

Philosophical Magazine 89, (13), (2009), S. 1141-1159

Müller, S.; Mühlhause, J.; Gall, S.; Reimers, W.:

Coextrusion of hybrid Mg/Al hollow profiles

In: Magnesium, 8th International Conference on Magnesium Alloys and Applications, ed. by K.U. Kainer, (2009), S. 621-626

Oddershede, J.; Schmidt, S.; Poulsen, H.F.; Margulies, L.; Wright, J.; Moscicki, M.; Reimers, W.:

Measuring the elastic strain of individual grains in a polycrystalline material - Extending a micro-scale technique to the nano-regime

in: Proceedings of the 30th Risoe International Symposium on Materials Science, (2009), S. 277-283

223/ Silvia, P.-A.; Weber, S.; Karlson, M.; Röttger, A.; Theisen, W.; Reimers, W.; Pyzalla, A. R.:

Hot direct extrusion of abrasion resistant Fe-base metal matrix composites – Interface characterization and mechanical properties of Co-extruded layered structures

In: Friction, Wear and Wear Protection, ed. by A. Fischer, K. Bobzin, (2009), S. 690-695

Uhlmann, E.; Huhns, T.; Richarz, S.; Reimers, W.; Grigoriev, S.:

Development and application of coated ceramic cutting tools

Industrial Ceramics 29, (2), (2009), S. 113-118

Weber, S.; Röttger, A.; Silvia, P.-A.; Karlson, M.; Theisen, W.; Reimers, W.; Pyzalla, A. R.:

Hot direct extrusion of Fe-base MMC: – A novel method for producing wear resistant thick coatings

In: Verbundwerkstoffe, 17. Symposium Verbundwerkstoffe und Werkstoffverbunde, ed. by W. Krenkel, (2009), S. 520-526

Zhang, P.; Flores-Renteria, A.; Wild, E.; Reimers, W.; Leyens, C.:

Oxidation-resistant Ti-90Al coatings with lotus effect surface morphology deposited on a γ -TiAl alloy

Scripta Materialia 61, (12), (2009), S. 1156-1159
